Talisker 1000 Series
Industrial Picosecond Lasers

Picosecond lasers are established in a range of markets and applications. Their extreme high peak power pulses instantly ablate work-piece materials, leaving a cleanly machined area that does not require a post process clean. Picosecond lasers are ideal for routine processing such as cutting, drilling, patterning or engraving. They are particularly well suited to removal of thin film coatings, without substrate damage. Virtually every advanced material can be machined to a state-of-the-art quality with the appropriate wavelength selection. Talisker is perfectly suited to machining metal, plastic, glass and semiconductors. Our applications engineering team will help to identify the most appropriate Talisker for you.

The Talisker has been designed for low cost of ownership processing with the minimal need for field service intervention. The modular design allows key components to be upgraded at the end user site. For total peace of mind the product line is supported by Coherent world wide service support. We can provide a service strategy to maintain your operations to their maximum potential.

Talisker 1000 Series Features:

- Easy plug-and-play install; equipped with auto-optimization features
- Excellent beam quality (M² <1.3)
- Optimized for single wavelength use
- Excellent pulse stability, no first pulse suppression required
- Shock, vibration, and thermal cycling tests for every laser
- Smart power supply with Ethernet, USB, and RS-232 control
- PermAlign™ solder-bonded optics technology
- Ultra-long-life AAA™ (Aluminum-free Active Area) laser diode material

Talisker 1000 Series Applications:

- 3D Microstructuring
- Advanced Packaging and Interconnects
- c-Si Dielectric Ablation
- Ceramic Processing
- Flex Circuit Machining
- Glass Cutting and Scribing
- Laser Ablation
- Laser Direct Patterning

Coherent follows a policy of continuous product improvement. Specifications are subject to change without notice. Coherent's scientific and industrial lasers are certified to comply with the Federal Regulations (21 CFR Subchapter J) as administered by the Center for Devices and Radiological Health on all systems ordered for shipment after August 2, 1976.

Coherent offers a limited warranty for all Talisker 1000 Series lasers. For full details of this warranty coverage, please refer to the Service section at www.Coherent.com or contact your local Sales or Service Representative.

INVISIBLE LASER RADIATION.

AVOID EYE OR SKIN EXPOSURE TO DIRECT OR SCATTERED RADIATION.

CLASS IV LASER RADIATION PRODUCT PER EN60825-1 (A2:2001)

ENERGY PER PULSE: 250 µJ at 200 kHz

EMITTED WAVELENGTH: 1064, 532 and 355 nm
